WHY NOW

- McKinsey, November 5, 2025: 88% of respondents said their organizations use AI in at least one business function
- McKinsey, November 5, 2025: 23% of respondents already scale agentic AI in at least one function, another 39% are experimenting
- Deloitte, January 21, 2026: worker access to sanctioned AI tools rose from under 40% to around 60% across 2025, or roughly 50%

BEACHHEAD WEDGE

- B2B companies with a complex operating cycle.
- Teams with manual cross-functional handoffs.
- Businesses that need AI inside workflows.

WHAT EXISTS TODAY

- Portal and control.
- Business modules.
- Executable workflows.
- AI and visibility.

WHY LOGICOT VS THE CURRENT STACK

- CRM / ERP / spreadsheets / manual approvals.
- AI helper next to work.
- Custom portal or internal tooling.
- Heavy enterprise system too early.

TARGET BUSINESS MODEL

Entry starts through a launch scope around the portal and selected modules, then continues through support, environment growth and expansion across workflows, AI and integrations.

WHY THIS CAN BECOME LARGE

The first wedge starts with Russia and Kazakhstan, then expands into a broader operating-layer category through the global AI software tailwind and the .com export path.

WHY THIS TEAM / RIGHT TO WIN

Logicot is founder-led today: the category thesis, working core and initial launch model already exist, and the round adds the first delivery team around engineering, QA, design and rollout.

WHY \$750K NOW

Pre-seed / \$750k / USD.
Illustrative use of funds: 58% to the first delivery team, 12% to infrastructure / AI / tooling, 12% to pilot delivery, 8% to investor and sales materials, 5% to legal/admin and 5% to reserve. The target is roughly 16-17 months to the next fundable milestone. Next step: Deck → guided demo → founder call.
